Playing house

Just like many children her age, Grace likes to play house. Here the children get empty bottles of lotion, put mud in them and pretend they are cooking food. Besides playing with Hazvinei, this is Grace's favourite activity.

'Come let us play Grace,' calls her friend from the neighbouring house Shelma. The two little girls begin to fix mud and leaves and when their imaginary food is ready they invite their mothers for lunch! You must come and taste Grace's cooking.

'When I see Grace with a lot of mud on her clothes then I know she must have been playing house,' says her mother laughing. She is very patient and does not stop Grace because she knows that babies like her enjoy playing the game.

Thank you so much for supporting Grace. She would not have grown within a loving family and home if it were not for your support.

Yours sincerely,

A handwritten signature in black ink that reads "Shallom".
